1. The Examiner has carefully considered Applicant's Response of 4/26/06. The Examiner does not find Applicant's amendment and argument persuasive to overcome the prior rejection. In particular, the Examiner finds that the assertion of unexpected results does not contradict a combination of the prior art for the reasons as set forth in the rejection, the results not commensurate with the scope of the claims.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-26, 29 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP51071206A (JP'206) in view of Inculet et al.

JP'206 discloses in the Abstract a method of forming a green compact comprising:

- providing a lubricant to a die wall

- providing a powder to the die;

- compacting the powder in the die to form a green compact; and

- further processing of the green compact.

The Examiner finds that the further processing inherently requires ejecting from the die.

However, JP'206 does not disclose wherein the die is heated.

Inculet et al. teaches to compact at warm temperature by heating the die in the same field of endeavor for the purpose of enhancing the lubricating property of the die (col. 5, lines 5-15). Inculet et al. teaches that this can be performed with zinc stearate, the same lubricant as used in JP'206.

Art Unit: 1742

It would have been obvious to one having ordinary skill to use the lubricant and compacting as taught by Inculet et al. in the invention of JP'206 in order to improve the efficiency of the lubricant and reduce die wear.

JP'206 further discloses wherein the powder includes titanium, aluminum and iron.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
